

Game of Lines

About:-

Game of lines is an event created for those who love coding. It is basically a line follower event which consists of two challenges. The event is guaranteed to shoot adrenaline levels high and create an atmosphere that will force you to put on your thinking caps.

Description:-

This is a two level event. The first round is a manual robotics challenge. The robot will be provided and it is up to the team to steer it and lead it to their autonomous robot. The second part deals with the autonomous robot. The path consists of a black line on a white background. The robot has to follow that black line.

Rules and regulations:

1. The checkpoints present at both the levels will earn the team points.
2. Completing the challenges in minimum time will score the team more points.
3. Originality of the design will score the team more points.
4. 12 Volts power supply will be provided.
5. The robot must fit in the dimensions 25cm*25cm*25cm.
6. The decision of the coordinators in case of any discrepancy will be final.
